

The CROWN® Annual Seminar Series is coming to Philadelphia

December 5th - 7th, 2022

Virtual Event

January 9th - 11th, 2023

Sessions include

- Radiation Oncology
- Medical Oncology & Infusion Centers
- Diagnostic Imaging
- Interventional Radiology Procedures
- Radiology Compliance and E/M Services
- Comprehensive Cardiology

Presented by

**The One Coding and Billing Conference
You Can't Afford To Miss**

www.RCCSinc.com | 877 - 626 - 3464

Are you ready for the coding and billing changes, updates, and challenges coming in 2023? The industry's leading experts from Revenue Cycle Coding Strategies® will get you prepared with both virtual and in-person options for three day CEU-eligible training at the world's best coding and billing seminar series - CROWN®.

Diagnostic Imaging: This fast-paced session will provide the information needed to submit accurate claims for diagnostic radiology services in 2023, including topics such as:

- New and revised codes
- Updates on CMS Appropriate Use Criteria (AUC) requirements
- Coding and documentation tips and traps
- CEUs Applied For: AAPC, ARRT, AHIMA, and RCCB

Interventional Radiology Procedures: Interventional coding hot topics and problem areas such as the following will be reviewed during this session:

- Diagnostic angiography and additional subselective imaging
- Challenging transcatheter procedures – lower extremity revascularization, dialysis circuit, embolizations, thrombectomy with infusion therapy
- Nonvascular procedures including biliary, urinary, biopsies, aspirations and more
- CEUs Applied For: AAPC, ARRT, MDCB, and AHIMA

Radiology Compliance & E/M Services: This one-of-a-kind session will address the complex topics of Radiology Compliance and E/M in a Radiology Practice, including:

- Detailed information of the E/M code definitions and guidelines for services performed by radiologists
- Federal fraud and abuse laws and initiatives
- Physician supervision, Orders for diagnostic tests, and more!
- CEUs Applied For: AAPC, ARRT, AHIMA, and RCCB

Radiation Oncology (2 Day Session): Whether you're working in a hospital, physician practice, or freestanding radiation treatment center, this session is your ticket to documenting and billing for specialty and external beam radiation oncology services in 2023, including topics such as:

- Coding for services performed and documented in a radiation center, including payer instructions and published requirements for documentation
- Complex coding and reimbursement for SRS/SBRT, proton therapy, brachytherapy, hyperthermia, radiopharmaceuticals and IORT
- Reimbursement and coding differences per technique and practice setting
- CEUs Applied For: AAPC, ARRT, MDCB, and AHIMA

Medical Oncology & Infusion Centers: The coding rules for drug administration are complex, and it's easy to make errors. This session is designed to help you make sense of the rules and apply them correctly, covering the following topics and much more:

- ICD-10-CM coding reminders for neoplasms and complications of care
- Tips for calculating and reporting additional hours of infusion
- Real-life examples of infusion encounters including chemotherapy, therapeutic drugs, and hydration
- CEUs Applied For: AAPC, ARRT, and AHIMA

Comprehensive Cardiology: What changes in cardiology coding will 2023 bring? Find out in this session as you examine coding guidelines and bundling issues related to a wide range of cardiology services including cardiac catheterization, pacemakers and ICDs, and electrophysiology services.

- Understanding the ins and outs of coding and billing for cardiac monitoring devices, pacemakers, and defibrillators
- Challenging cardiac catheterizations and percutaneous interventions
- Nuances of peripheral procedures – vascular, angiography with heart catheterization and interventions
- CEUs Applied For: AAPC and AHIMA
